

Jennifer,

To say that you are an exceptional doctor doesn't even give you the justice you deserve... you go BEYOND that... & it's frustrating for me to express my indescribable experience w/you because you are such a gifted doctor. Thank you so very much for your patience & deep understanding, your knowledge of both Eastern & Western treatments expands so far from any other doctor's approach... & that was just the approach I needed & was searching for. It was truly Refreshing to receive both your head AND heart... your wisdom & compassion... in my experience meeting you. So few people are in the right profession, but you have found your calling. Still, these words sound so inadequate to how I feel... how impossible it is to express my most sincere & ample gratitude for you having lifted me to such a towering height.  I
